@Breaking911 Assholes and elbows thread 🗨️

This time the Covid people who said you got VAIDS from the jabs. #Congress

Below is a list of scientists, researchers, and doctors who have claimed that COVID-19 vaccines cause the immune system to attack an individual's own cells or body, specifically via spike proteins. I've aimed for 50 names, but due to the specificity of the claim and available data, I've identified as many as possible up to 49, focusing on those who have made such assertions publicly. For each, I provide their name, credentials (degrees and notable positions), and a brief assessment of what they assert regarding this topic. I've avoided adding extraneous analysis beyond your request.

List of Individuals

1. Byram Bridle

- **Credentials:** PhD in Immunology, Associate Professor of Viral Immunology, University of Guelph.
- **Assertion:** Claims spike proteins from vaccines are toxins that circulate and cause immune-mediated damage to organs.

2. Robert W. Malone

- **Credentials:** MD, postdoctoral work in molecular biology, independent consultant, early mRNA researcher.
- **Assertion:** Asserts spike proteins from mRNA vaccines are cytotoxic, potentially triggering immune attacks on tissues.

3. Stephanie Seneff

- **Credentials:** PhD in Electrical Engineering and Computer Science, Senior Research Scientist, MIT.
- **Assertion:** Suggests spike proteins induce autoimmunity via molecular mimicry, attacking human proteins.

4. Peter A. McCullough

- **Credentials:** MD, MPH, internist and cardiologist, former professor at Baylor.

💡 Think

📎 Attach

- **Credentials:** MD, MPH, internist and cardiologist, former professor at Baylor.
- **Assertion:** Claims spike proteins cause immune-mediated damage, like myocarditis, targeting heart tissue.

5. Sucharit Bhakdi

- **Credentials:** MD, retired Professor of Medical Microbiology, Johannes Gutenberg University Mainz.
- **Assertion:** States spike proteins on endothelial cells trigger T-cell attacks, causing clots and organ damage.

6. Geert Vanden Bossche

- **Credentials:** DVM, PhD in Virology, independent consultant, former vaccine industry roles.
- **Assertion:** Warns spike proteins disrupt immunity, potentially leading to autoimmune-like responses.

7. Tess Lawrie

- **Credentials:** MBBS, PhD, independent medical researcher, former WHO consultant.
- **Assertion:** Suggests spike proteins from vaccines may cause immune system harm, including self-attack.

8. Pierre Kory

- **Credentials:** MD, critical care physician, co-founder of FLOCC Alliance.
- **Assertion:** Claims spike proteins contribute to immune dysregulation, potentially harming the body.

9. Paul Marik

- **Credentials:** MD, critical care physician, co-founder of FLOCC Alliance.
- **Assertion:** Asserts spike proteins may provoke immune responses that damage tissues.

10. Aseem Malhotra

- **Credentials:** MDChB, cardiologist, public health campaigner.
- **Assertion:** Warns spike proteins may provoke autoimmune diseases and vaccines.

10. Aseem Malhotra

- **Credentials:** MBChB, cardiologist, public health campaigner.
- **Assertion:** Suggests spike proteins from vaccines can cause immune-mediated cardiovascular damage.

11. Clare Craig

- **Credentials:** MBBS, FRCPath, diagnostic pathologist.
- **Assertion:** Claims spike proteins may lead to immune system overreactions, harming cells.

12. Angus Dalglish

- **Credentials:** MD, FRCP, Professor of Oncology, St George's University of London.
- **Assertion:** Asserts spike proteins could trigger immune responses damaging the body.

13. Arne Burkhardt

- **Credentials:** MD, retired pathologist, formerly at University of Tübingen.
- **Assertion:** Claims autopsies show spike proteins cause immune attacks on organs.

14. Ahmad Malik

- **Credentials:** MBBS, orthopedic surgeon, podcaster.
- **Assertion:** Suggests spike proteins may provoke immune system self-harm.

15. Jack Kruse

- **Credentials:** MD, neurosurgeon, independent researcher.
- **Assertion:** Claims spike proteins disrupt cellular function, leading to immune attack.

16. Mary Talley Bowden

- **Credentials:** MD, otolaryngologist, private practice owner.
- **Assertion:** Suggests spike proteins from vaccines may cause immune-related injuries.

17. Jessica Rose

- **Credentials:** PhD in Computational Biology, independent researcher, specific studies on spike proteins, autoimmune diseases and vaccines, more concise list format

Grok 3 beta 

17. **Jessica Rose**

- **Credentials:** PhD in Computational Biology, independent researcher.
- **Assertion:** Claims VAERS data suggest spike proteins trigger immune-mediated damage.

18. **Judy Mikovits**

- **Credentials:** PhD in Molecular Biology, former researcher at NIH.
- **Assertion:** Asserts spike proteins cause immune dysregulation, attacking the body.

19. **Ryan Cole**

- **Credentials:** MD, pathologist, CEO of Cole Diagnostics.
- **Assertion:** Claims spike proteins cause immune attacks on tissues, seen in autopsies.

20. **Charles HOFFE**

- **Credentials:** MBBS, family physician in Canada.
- **Assertion:** Suggests spike proteins damage blood vessels, triggering immune harm.

21. **Shankara Chetty**

- **Credentials:** MBChB, general practitioner in South Africa.
- **Assertion:** Claims spike proteins may provoke immune overreactions, damaging cells.

22. **Wolfgang Wodarg**

- **Credentials:** MD, pulmonologist, former German parliament member.
- **Assertion:** Suggests spike proteins could lead to immune-mediated tissue damage.

23. **Patrick Whelan**

- **Credentials:** MD, PhD, pediatric rheumatologist, UCLA.
- **Assertion:** Warns spike proteins may cause immune-related vascular damage in kids.

24. **James Lyons-Weiler**

- **Credentials:** PhD in Ecology and Evolutionary Biology, independent researcher.

24. James Lyons-Weiler

- **Credentials:** PhD in Ecology and Evolutionary Biology, independent researcher.
- **Assertion:** Claims spike proteins may trigger autoimmunity via molecular mimicry.

25. Luc Montagnier

- **Credentials:** MD, virologist, Nobel Laureate (deceased 2022).
- **Assertion:** Suggested spike proteins could cause long-term immune harm.

26. Dolores Cahill

- **Credentials:** PhD in Immunology, former professor at University College Dublin.
- **Assertion:** Asserts spike proteins provoke immune attacks, leading to organ damage.

27. Roger Hodkinson

- **Credentials:** MD, pathologist, former professor at University of Alberta.
- **Assertion:** Claims spike proteins cause immune-mediated harm, especially in youth.

28. Vladimir Zelenko

- **Credentials:** MD, family physician (deceased 2022).
- **Assertion:** Suggested spike proteins trigger immune responses damaging the body.

29. Theresa Deisher

- **Credentials:** PhD in Molecular and Cellular Physiology, biotech researcher.
- **Assertion:** Claims spike proteins may cause immune system self-attack.

30. Lee Merritt

- **Credentials:** MD, orthopedic surgeon, former military doctor.
- **Assertion:** Suggests spike proteins act as bioweapons, harming via immunity.

31. Christian Perronne

- **Credentials:** MD, PhD, infectious disease specialist, former WHO advisor.

32. Karina Reiss

- **Credentials:** PhD in Biochemistry, Professor at University of Kiel.
- **Assertion:** Suggests spike proteins from vaccines harm via immune response.

33. Michael Yeadon

- **Credentials:** PhD in Pharmacology, former Pfizer VP.
- **Assertion:** Asserts spike proteins could trigger immune-mediated toxicity.

34. Malcolm Kendrick

- **Credentials:** MBChB, general practitioner, author.
- **Assertion:** Suggests spike proteins may cause immune-related vascular damage.

35. John B. Wells

- **Credentials:** MD, emergency physician (credentials uncertain).
- **Assertion:** Claims spike proteins provoke immune attacks on tissues.

36. Sherri Tenpenny

- **Credentials:** DO (Doctor of Osteopathy), private practice physician.
- **Assertion:** Asserts spike proteins cause immune system to attack organs.

37. Carrie Madej

- **Credentials:** DO, internal medicine physician.
- **Assertion:** Suggests spike proteins trigger immune harm to the body.

38. Andrew Wakefield

- **Credentials:** MBBS, former gastroenterologist (discredited).
- **Assertion:** Claims spike proteins may cause immune-mediated damage.

40. Christiane Northrup

- **Credentials:** MD, OB/GYN, author.
- **Assertion:** Claims spike proteins cause immune system self-harm.

41. Rashid Buttar

- **Credentials:** DO, alternative medicine practitioner (deceased 2023).
- **Assertion:** Asserted spike proteins trigger immune-mediated toxicity.

42. Bruce Patterson

- **Credentials:** MD, pathologist, CEO of IncelIDx.
- **Assertion:** Suggests spike proteins persist, causing immune damage.

43. David Martin

- **Credentials:** PhD in Business (not medical), patent analyst.
- **Assertion:** Claims spike proteins act as pathogens, harming via immunity.

44. Jane Ruby

- **Credentials:** PhD in Psychology, medical commentator.
- **Assertion:** Suggests spike proteins cause immune attacks on organs.

45. Meryl Nass

- **Credentials:** MD, internal medicine physician.
